PRIMARY EXAMINER

***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance:

Applicants have claimed a semiconductor wafer cleaning formulation for use in post plasma ashing semiconductor fabrication comprising the following components in the percentage by weight ranges shown:

At least one organic amine 15-60%

Water 20-60%

An ammonium borate compound 9-20%.

The closest prior art of Wojtczak et al, US 6,224,785 teaches a semiconductor cleaning composition comprising ammonium fluoride, organic amine, and water (see abstract). The prior art does not teach the specific components in the proportions presently claimed. Accordingly, the present claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
